Report on GD&T Knockout

Name of the Activity: GD&T Knockout

Date/Time: 4th October and on 16th November

Venue: Instrumentation Auditorium

Type of audience: TY Mechanical

Short description of the activity:

The session was held in the form of a discussion based on the presentations by the participating students and insightful inputs from Sir. The presentations consisted of an Inspection Report based on the selected component and developing a gauge model with reference to the ASME Y14.5 guidelines for gauges. The students engaged in an intellectual discussion and received feedback on their presentations and learnt more about the latest changes and modifications in codes of ASME Y14.5. Sir provided valuable inputs to deepen the understanding of the subject and get acquainted with the standards in industry applications.

No. of Participants: 70

Speaker details: Mr. Anand Bhise sir is the Director of MechaTol Engineering Solutions. With a deep commitment to dimensional management, sir has trained over 6,000 engineers. His extensive experience includes providing GD&T and Tolerance Stack Up training to more than 110 companies across India, as well as training firms in Germany and the USA.

Sir has a strong background in collaborating with prestigious organizations such as Bharat Forge, Tata Group, and Mercedes-Benz. His work has not only focused on GD&T but also on various cost management strategies, empowering companies to enhance efficiency and profitability through techniques like Zero Based Costing and Activity Based Costing.
